BENEFITS:

- ✓ *Helps regulate blood pressure*
- ✓ *Protect the cardiovascular system*
- ✓ *Collaborates in the control of blood sugar levels*
- ✓ *Antioxidant action*
- ✓ *Helps improve circulation*
- ✓ *Strengthens the immune system*
- ✓ *Collaborates in the treatment of varicose veins*
- ✓ *Anti-inflammatory action*

ADVANTAGES:

BPS has ingredients specifically chosen to strengthen, prevent and collaborate against circulatory system diseases, in addition to having antioxidant, anti-inflammatory and defense properties.

WHY BPS?

BPS is elaborated by the best team, always thinking about the healthy improvement of people who have a hypertensive problem. It seeks to provide support in the regulation of blood pressure.

INGREDIENTS:

Grape seed extract: its components, catechin and epicatechin, provide the beneficial properties that are recognized such as neutralizing free radicals, reducing blood pressure and helping vascular functioning in general.

Grape skin extract: this ingredient is used for its known cardiovascular protective, neuroprotective, immune system strengthening properties. It also contains polyphenols and tannins that strengthen the circulatory system, and its vasoconstrictive and astringent properties help prevent diseases such as varicose veins.

Polygonum cuspidatum extract: polyphenol found in berries and fruits, its natural properties help the body to lower cholesterol, control hypertension, protect the cardiovascular system, control insulin, reduce inflammation and protect the immune system, as well as anti-longevity actions.

Green tea extract: contains two potent antioxidants, mainly responsible for the health benefits, help lower cholesterol and protect against skin, lung, esophagus, small intestine, colon, liver, breast and pancreas tumors.

Proteases: an enzyme that breaks the peptide bonds of proteins, reducing them to organic monomers called amino acids, originating in the stomach or pancreas.

Copper: this mineral is essential for the body in the production of collagen, thus collaborating in the maintenance of bones, skin, cartilage and tendons. It is also involved in the absorption of vitamin C and collaborates in the maintenance of the central nervous system and the immune system.

Cranberry extract: this fruit has been used as a support in urinary tract infections, it also fights bacteria and helps control blood pressure.
