WHY PROENZI+?

Capsules formulated to provide the body with digestive enzymes, probiotics and prebiotics, which fulfill protective functions of the intestinal flora and strengthen the immune system. Thus improving health and quality of life.

INGREDIENTS:

Lactobacillus acidophilus: good bacteria used in the treatment of digestive disorders, great support against diarrhea and in pulmonary and vaginal infections.

Lactobacillus casei: collaborates in the maintenance of the intestinal flora, supports the preservation of the immune system, cell renewal of the intestinal epithelium and fights respiratory infections.

Lactobacillus plantarum: improves intestinal transit and general nutritional status.

Bromelain: serves as a support in the prevention of intestinal problems and digestive process, weight control. Improves blood circulation, works as an anti-inflammatory and promotes the regeneration of muscle fibers.

Papain: recognized for its anti-inflammatory properties. Its consumption provides support in the digestive process, protein assimilation, pain reduction and during recovery from injuries and surgeries.

Fungal Lipase: i is a key component of lipid and lipoprotein metabolism.

Alpha galactosidase: supports the digestion of sugars from grains, vegetables and cereals; the process of its function in the body helps in the elimination of gases.

Aspergillus fungal protease: improves protein digestion; its consumption has been linked to improved muscle function.
